

Aims and Scope

Bio-surface and Bio-tribology, publishes high quality papers on the surface and tribology associated with bio-systems. The scope includes all aspects of tribology-based science and technology on natural bio-surfaces, natural organs and tissues, body fluids, bio-materials and coatings, interfaces between biological tissues and medical, sport devices or articles for daily use as well as bionic tribo-designs. Original research articles, topical reviews, case reports and short communications are welcome.
